

Assignment #8

시스템경영공학과 2016314726

정영준

This week's seminar was serving by professor JeongTaek-Kong. He introduced his own rules for good life. 1. Let go of the idea that you can't do. 2. Have a big goal 3. When you get to work, bite and stretch. 4. Do your best to the point where you go too far. 5. Find your own cause before you find a reason. 6. Be humble and kind. 7. Read books, search materials, and keep records. 8. Figure anything out by numbers. 9. Learn thoroughly, direct and check. 10. Always thinking then checking then having belief.

He says that we should not be followers of change, but lead change. Samsung wants to hire men who aim high, are professional, has improved collaborations and stay foolish. Knowho, Proactive Self-Management, Show & Tell Teamwork (협력, 소통, 주인의식), Leadership & Followership are essential to be a star engineer. Let me introduce Google's hire attributes. 1. Coding(and math, computing) skills for technical role (50 % of the roles in Google). 2. General cognitive ability != IQ 3. Emergent leadership (vs. traditional leadership) – relinquish power. 4. Humility and ownership 5. Expertise is least important attributes. 6. GPA are worthless as a criteria for hiring unless truly reflecting skills in the areas that you can apply. 7. Soft skills (contains Leadership, humility, collaboration, adaptability and loving to learn and re-learn.

Resume is also very important for us. Resume is a summary of your qualifications – Education, Experiences, Skills. Resume can be our marketing tool because it is an advertisement on us.
